THEME OF POPE FRANCIS' MESSAGE FOR WORLD COMMUNICATIONS DAY 2019

If the Internet represents an extraordinary possibility of access to knowledge, it is also true that it has proven to be one of the areas most exposed to disinformation and to the conscious and targeted distortion of facts and interpersonal relationships, which are often used to discredit.

Coming soon ... on May 23 at St. Charles Borromeo Seminary ... a discussion with Bill McGurn from the The Wall Street Journal about the papal message at the Symposium for World Communications Day 2019

Being *members one of another* is the profound motivation with which the Apostle invites us to put away falsehood and speak the truth: the duty to guard the truth springs from the need not to belie the mutual relationship of communion. Truth is revealed in communion. Lies, on the other hand, are a selfish refusal to recognize that we are members of one body; they are a refusal to give ourselves to others, thus losing the only way to find ourselves.
